airscan

Better Air Quality

Airscan improves the health, well-being, and sustainability of our society by providing a comprehensive, integrated approach to clean air, both indoors and outdoors.
Our A.I.R. Approach: **A**nalyze **I**mprove **R**eport

Analyze

- In-and outdoor **air quality assessments** to measure pollution.
- Long term air quality **monitoring**.
- Analyse particulate matter, chemical and biological compounds.
- Green building **performance testing** (Air, Water, Light, Acoustics) for BREEAM, WELL, Leed, DGNB, etc.

Improve

- Develop plans and **solutions** to improve air quality and make ventilation systems smart and more **energy efficient**.
- Help municipalities transition towards healthier, smarter, and more **sustainable cities**.

Report

- Report and **visualize** information to stakeholders in an understandable way.
- Provide **actionable insights** to raise awareness, comply with health and safety regulations and improve overall sustainability of workspaces and cities.

Our Pillars

STORY

in 2018, Airscan was established as a spin-off of CO2logic, a pioneer in environmental and climate advisory services. While CO2logic assists organizations in calculating, reducing and offsetting their ecological footprint, Airscan offers high-quality solutions for indoor and outdoor air quality matters.

MISSION

On a day-to-day basis we model, assess, predict and enable communication about air quality. We provide solutions to measure, raise awareness and improve air quality, following the philosophy of business at the service of people & planet.

VALUES

Airscan combines **innovation** and in-depth scientific **knowledge** to improve air quality and **sustainability** of our in- and outdoor environment. Our eco-system of **strong partnerships** allows us to offer a wide range of solutions to our customers and **give back to society** through our social and environmental projects.
